

Take control of your payment collections with Storman

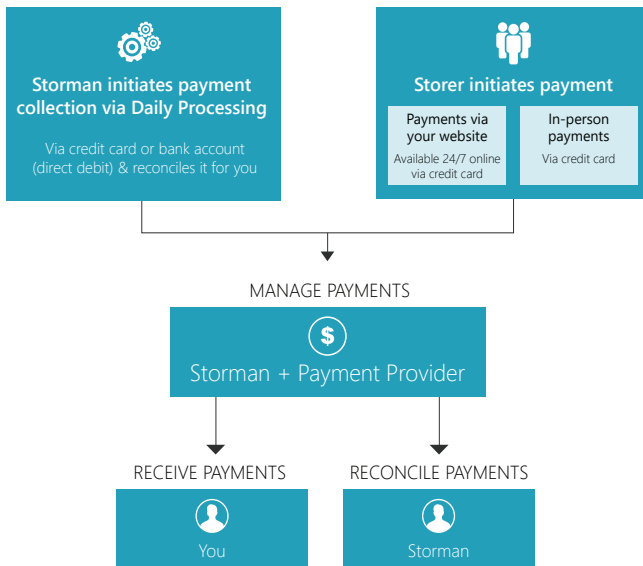

Storman helps you manage your payment collections

Daily Processing to automatically collect payments

- Automatically collect payments due to be paid during Daily Processing and have receipts added automatically.
- Rent increases are automatically collected requiring no manual intervention.

24/7 online payment portal (Storman Payments) for your web site

- Using the Storman Payments portal, your storsers can make payments from their home or mobile device, even when your office is shut.
- Storman Payments can be fully integrated into your website and branded in your company colours.
- Storman Payments integrates with Storman One, recording the payment, reconciling the receipt and updating customer balances.

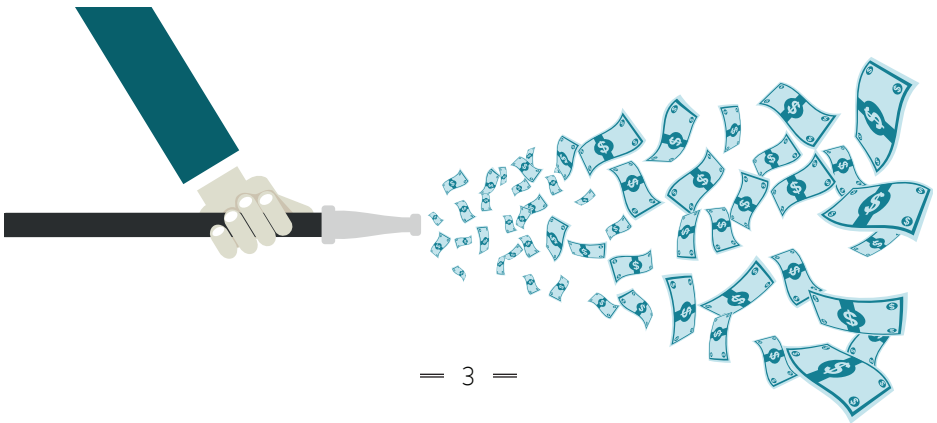

The benefits to your business

1. Your cash flow will improve

- Get paid on time by automatically collecting regular payments via Storman Daily Processing, either via credit card or direct debit.
- Give your storers more payment options via the online payment portal
- Choose to pass some, or all of the payment processing fee's onto your storer, giving you an immediate bottom line boost.

2. Your storer debt will reduce

- Achieve 95% payment success rates and spend more time chasing genuine debt, as opposed to storers who have "forgotten" to pay you.
- Take control by letting Storman request the payments for you, rather than waiting for the storer to send you a payment.

3. It will save you time

- Automatic reconciliation and updating of the Storman record means accurate data and no more double entry for staff.
- Collection amounts are automatically updated to reflect rent increases that you have setup.
- Refund directly from within Storman. Simply select the payment and click "Refund".
- Set and forget the payments for those customers that choose it. This means storers stay longer and are less likely to evaluate their need for storage at the time of a rent increase.

4. Your business will be safer

- PCI compliance from the payment processor allows your business to handle payments in a compliant way, which helps negate the risk of credit card fraud and unauthorised payments.
- Less cash handled by your staff means that there is less risk of fraudulent activity.

Your payment collection options

- One-off credit card payments are available for online payments (using Storman Payments), or over-the-counter payments.
- With Storman's Daily Processing, you have a choice of accepting payments via credit cards, direct debit from a bank account, or a combination of both.
- Integrated payments are simple to setup & manage.
